

AKASH VISHWAKARMA

Linux System Administrator | Junior DevOps | Cloud Support

Wagle Estate, Thane (Mumbai Metropolitan Region), Maharashtra, India | +91-9918331262 | akashvishwakarma1262@gmail.com
LinkedIn: linkedin.com/in/akash-vishwakarma-48b176258 | Portfolio: akash991833.github.io

PROFESSIONAL SUMMARY

BCA graduate (June 2026) and hands-on Linux System Administrator with a strong foundation in Linux administration, networking, virtualization, and troubleshooting. Built and managed a personal Linux home lab covering RHEL, CentOS, Ubuntu, Fedora, Debian, and Kali Linux across VMware, VirtualBox, dual-boot, and physical environments. Comfortable with user and group management, file permissions, package management, shell scripting, MySQL/PostgreSQL, Git, and Python automation, with basic working knowledge of Docker, AWS, and Kubernetes. Uses AI tools (ChatGPT, prompt engineering) to accelerate troubleshooting, documentation, and task automation. Fast learner with strong analytical skills, seeking an entry-level Linux System Administrator, Junior DevOps, or Cloud Support role in Mumbai.

TECHNICAL SKILLS

Operating Systems	RHEL, CentOS, Ubuntu, Fedora, Debian, Kali Linux, Windows 10/11
Linux Administration	Installation, Boot Process, GRUB, User & Group Management, File Permissions, ACL, LVM Basics, Disk Management, Process Management, Service Management, System Monitoring, Log Analysis, cron scheduling
Package Management	APT, YUM, DNF, RPM
Networking	TCP/IP, OSI Model, DNS, DHCP, Subnetting, Routing Basics, SSH, SCP, Firewall Basics, SELinux Basics, Netstat, SS
Containers & Cloud	Docker (basics), AWS (basics), Kubernetes (basics)
Virtualization	VMware Workstation, VirtualBox, Dual-Boot Configuration
Scripting & Programming	Bash (Basic Shell Scripting), Python
Databases	MySQL, PostgreSQL
Tools & Version Control	Git, GitHub, VS Code
Productivity & AI	MS Excel, MS Word, PowerPoint, ChatGPT, Prompt Engineering, AI-Assisted Troubleshooting, Documentation & Automation

HANDS-ON LINUX ADMINISTRATION EXPERIENCE

Self-driven, project-based practice: 3-4 months of consistent hands-on learning in a personal home lab (not paid employment).

- Installation & Configuration:** Installed and configured RHEL, CentOS, Ubuntu, Fedora, Kali Linux, and Debian on VMware, VirtualBox, dual-boot, and physical machines.
- System Administration:** Managed users/groups, file permissions and ownership, disk and storage basics, running services, and cron-based task scheduling.
- Networking:** Configured SSH access, tested connectivity with ping/netstat/ss, and applied basic firewall and subnetting concepts across lab VMs.
- Troubleshooting:** Diagnosed boot, service, and package issues using log analysis and AI-assisted troubleshooting to speed up root-cause identification.
- Database Administration:** Installed and configured MySQL and PostgreSQL; practiced CRUD operations, joins, and basic data management.
- Automation & Documentation:** Wrote Python scripts to automate file and system tasks; used Git/GitHub for version control and documented lab setups for repeatability.

PROJECTS

Enterprise Linux Practice Lab - Built a multi-distro lab (RHEL, CentOS, Ubuntu, Fedora, Debian, Kali) across VMware and VirtualBox to simulate enterprise server administration: installation, user management, networking, and service configuration.

Python Automation Scripts - Developed Python utilities to automate repetitive file-handling and system administration tasks, reducing manual effort for common lab operations.

Database Administration Practice - Set up and managed MySQL and PostgreSQL instances; practiced schema design, CRUD operations, joins, and query optimization basics.

Dual-Boot & Recovery Setup - Configured dual-boot environments and troubleshoot GRUB/boot-related issues to build practical recovery skills.

EDUCATION

Bachelor of Computer Applications (BCA) - Tilak Maharashtra Vidyapeeth, Pune	Completed June 2026
Higher Secondary (12th), UP Board - 69%	2023
Secondary School (10th), UP Board - 74.4%	2020

CERTIFICATIONS

MS-CIT | Linux Administration (Self-Paced/Practice) | Python Programming | MySQL & PostgreSQL (Database Fundamentals) | AI Productivity & Prompt Engineering
